

### 3OE SCIENTIFIC

**Iggy: An innovative approach to hand hygiene**

Iggy is a first in class hand hygiene product that promotes human health. A combination of vortex-oscillation spray and aqueous ozone, a natural disinfectant, safely and effectively removes bacteria, fungi, and viruses (including the virus that causes COVID-19) in just 7 seconds. Sensors automatically trigger a “touchless” cycle, and Iggy’s AI provides use and device health data via the cloud, creating an administrative dashboard. Iggy facilitates sustainability by consuming less than 1/3 the amount of water for hand washing and through zero contribution to the waste stream. Unlike other hand hygiene products, Iggy does not cause resistant “superbugs.” Iggy is a safer, faster, better approach to cleaning hands. <https://www.3oescientific.com> Carmel

### A. J. SCHNELL WOODWORKS

**Solid maple coffee table**

This is a one-of-a-kind solid maple cookie coffee table with epoxy resin fill. It weighs approximately 550 pounds and has a mobile base. <https://www.ajschnellwoodworks.com> Zionsville

## ALCOA WARRICK OPERATIONS

### Aluminum

Alcoa Warrick's three Smelter potlines consist of 150 pots each that make more than 300 million pounds of pure aluminum annually. The Warrick Power Plant provides electricity, potable water and steam for all of the production facilities at the location. <https://www.alcoa.com/global/en/home> *Newburgh*

## ALGALCO

### Hydrogen on demand

A means of generating hydrogen on demand as a supplemental fuel for municipal and fleet vehicles. There are two unique features. Hydrogen on demand is deployed immediately through the intake manifold of standard internal combustion engines. Hydrogen increases fuel mileage while decreasing harmful emissions. There is no need to store hydrogen. And secondly, the feedstock for hydrogen is aluminum. After the alloy has reacted, it becomes aluminum oxide which can be recycled for an indefinite number of times via standard aluminum industry techniques. [www.algalco.com](http://www.algalco.com) *Indianapolis*

**AMATROL INC.**  
**Skill Boss Logistics**

Amatrol's Skill Boss Logistics (95-MSB3) offers material handling organizations performance-based assessment for evaluating the skill levels and competencies of future supply chain automation technicians. It was designed to teach and assess 100 industry relevant hands-on skills and includes FaultPro, a computer-based fault insertion system. FaultPro inserts over 45 real-world faults and tests technicians' troubleshooting abilities.

<https://amatrol.com/product/skill-boss-logistics/> *Jeffersonville*

**ANCHOR INDUSTRIES**  
**Fire shelters**

Anchor New Generation Fire Shelters are manufactured to U.S. Forestry Service specifications and are U.S. government approved. With our manufacturing processes ISO 9001 certified, you can rest assured knowing that the utmost care and precautions are taken to craft the highest quality Fire Shelter. Offering increased protection from radiant and convective heat in wildland firefighter entrapment situations, Anchor New Generation Fire Shelters are the dependable solution for wildfire protection. Anchor Industries Inc. has been manufacturing government approved fire shelters for over 30 years. With specially designed manufacturing equipment, shelters are produced in large quantities with rapid turnaround. Anchor offers two sizes in the fire shelters, regular and large, as well as training practice fire shelters in both sizes. <https://anchorinc.com> *Evansville*

**ANDYMARK INC.**  
**Compliant wheel**

These fun, little "squishy" wheels were introduced into the educational competition robotics market in 2016 in the 2 inch and 4 inch size. Because of their popularity and effectiveness to move objects, the company has since expanded our offerings to 53 options including 2", 2.25", 3" and 4" wheels all with a variety of bores and four different durometers (technical term for squishiness). Since 2016, we have sold over 144,000 of these wheels. The AndyMark Compliant Wheel is ideal for high-performance intakes and internal conveyors, and you can find these wheels on FIRST Robotics Competition robots around the world. [www.andymark.com](http://www.andymark.com) *Kokomo*

**BELSTRA MILLING COMPANY**  
**NatureServe duck starter/grower**

NatureServe Duck Starter/Grower feed is packed with fresh ingredients, prebiotics and probiotics to promote digestive health and essential oils to help support the immunity of ducklings. During January 2021, we added this newly developed duck starter/grower feed to the NatureServe feed line. With the duckling feed being a new introduction this year, it has drawn interest in duck and goose owners in Indiana and nationally. Made in a crumble format, this feed provides young starting and growing ducklings the nutrition needed for optimal bone and developmental growth and with a balance of amino acids. The essential oils of white thyme, cinnamon and oregano, found inside of the crumble feed extends a natural approach to raising animals and offers anti-microbial, antioxidant, anti-viral and anti-fungal properties to support animal health. Additionally, prebiotics and probiotics can be found beneficial to the animal by enhancing gut function. [www.NatureServeFeed.com](http://www.NatureServeFeed.com) *DeMotte*

## BIOMASS ENGINEERING & EQUIPMENT

### Smart conveyor

To understand how cool SMART Conveyors are, you must realize how much of an advance they represent in conveyor technology. Companies that handle biomass have for years employed conveyors that are by and large little different than they were a century ago. However, as demand for biomass has increased and the scale of operations has grown, the need for something better has grown apparent. Our conveyors meet this need. SMART Conveyors break from standard chain conveyor designs to achieve unparalleled reliability and efficiency (less power consumption) while subsequently complying with the NFPA's standards for wood dust explosions. While there are many features unique to our conveyors, the most obvious is our chain and paddle design. Unlike most other drag conveyors, we run two chains in parallel in channels outside the path of the material. To these, we connect paddles, which we keep from touching the conveyor floor. This design reduces friction and wear in our conveyors, so they require less power and maintenance. Our conveyors are transporting biomass that's being turned into heat energy, solid fuel, biochar, and biogas, as well as traditional products like particleboard and animal bedding. Applications that have relied on SMART Conveyors haven't been limited to biomass. Other materials for which our conveyors have been chosen include cattle feed, recycled tires and grains. <https://www.biomassengineeringequipment.com/> Indianapolis

## BIRTHDAY CHOCOLATES

### Birthday Chocolate candies

We would like to mail a small gift-box of Birthday Chocolates to each of your employees at their home address - to arrive on or the day before each person's birthday - with whatever personalized message you desire on the enclosed birthday greeting card. Please go onto our web site for a free sample. [www.BirthdayChocolates.com](http://www.BirthdayChocolates.com)

**BTI, INC. DBA AMERI-CAN ENGINEERING**  
**831 Veranda Royale Cottage ADA Lift Room - Mobile Restroom Trailer**

The 831 Veranda Royale Cottage with ADA LR features three extra-large private non-disabled toilet suites along with a fully ADA compliant private suite. The non-disabled suites are accessed via a covered porch with two step assemblies. The ADA suite hydraulically lowers to sit on the ground and comes standard with a fold-in-door ramp assembly. This model also features cedar shake exterior siding and vinyl rails along the covered porch, faux chalkboard windows, Amish-crafted specialty doors with opaque window each with an occupant's indicator door lock, board-and-batten style interior trim, two-tone walls (Shadow on top with Designer White bottom), an industrial grade luxury vinyl linoleum, music system with speakers in each suite and mounted in the ceiling of the porch, motion sensor lights for each suite, and hands-free faucets. Each non-disabled suite comes standard with pedestal sinks with mirror, ceiling-mounted light fixtures, and electric push-button flushing toilets. The ADA suite includes a macerating ADA toilet system, wall-hung ADA lavatory with mirror, ADA grab rails, and ceiling-mounted light fixture. [www.ameri-can.com](http://www.ameri-can.com) *Argos*

## CATERPILLAR

### Cat® 3512E Tier 4 Dynamic Gas Blending (DGB™) Engine

Built in Lafayette, the 3512E with DGB is the first and only Dynamic Gas Blending (DGB) engine in the industry certified to U.S. EPA Tier 4 Final emission standards. It's a recipient of the U.S. Environmental Protection Agency's (EPA) 2020 Clean Air Excellence Award in the Clean Air Technology category. The 3512E DGB engine provides a lower fuel cost, a smaller environmental footprint and robust diesel performance. Dynamic Gas Blending engines can utilize natural gas and diesel fuel to power an application depending on which is available, lowering their total cost of ownership. In an oil and gas well service operation, customers can capture gas that would otherwise be expelled from the operation into the atmosphere and use it to fuel the engine. When gas is not available, diesel fuel can be used. This innovative dual-fuel technology enables the engine to automatically maximize the amount of natural gas used to displace diesel and offers the industry's best diesel displacement rate of up to 85%. This means an engine that burns 100 gallons of diesel an hour in 100% diesel mode can burn as little as 15 gallons an hour in dual-fuel mode. [https://www.cat.com/en\\_US/by-industry/oil-and-gas/dynamic-gas-blending-engines/3512E-dgb-engine.html?\\_ga=2.242349760.37392227.1639404942-1849058261.1623955848](https://www.cat.com/en_US/by-industry/oil-and-gas/dynamic-gas-blending-engines/3512E-dgb-engine.html?_ga=2.242349760.37392227.1639404942-1849058261.1623955848)

## CEEK WOMEN'S HEALTH

### Nella NuSpec (a Time magazine 2020 best invention)

Women' health care has been largely lacking innovation – until now.. Ceek identified the need for a product that considers the perspective of women of all ages and in all stages in life. Ceek worked with designers, health care experts, OBGYN providers and patients to develop an updated reusable vaginal speculum, Nella NuSpec – which was named one of Time magazine's best inventions of 2020. The commonly used vaginal speculum is a common of anxiety and discomfort for women undergoing gynecological exams. The design of the vaginal speculum has

been virtually unaltered since it's it was invented (by a man) over 150 years ago. NuSpec is designed to inspire women to expect more from their experience in the exam room. NuSpec also ensures that health care providers have an ergonomic, easy to use device that allows access to the cervix for exams and procedures. The NuSpec reusable vaginal speculum utilizes a narrow bill- about the size of a regular tampon- to optimize patient comfort. The NuSpec improves comfort for any patient, but it can make a drastic difference in the exam experience for specific populations, such as first-timers, transgender patients, post-menopausal women and cancer survivors.

<https://ceekwomenshealth.com/nella-nuspec> *Portland*

## **CENTRE LIGHT SOLUTIONS**

### **Strialite stretch mark solution**

Strialite is the first FDA-cleared home stretch mark device. Paired with four highly effective topical creams formulated for exfoliation and cell turnover, the Strialite™ brand helps to reduce the appearance of stretch marks that are red in appearance. The Strialite products were designed and manufactured by Dr. Downs, a board-certified plastic surgeon in Mishawaka Indiana, in response to an urgent need of his own daughter—and the patients at his plastic surgery practice—to reduce red, angry looking stretchmarks that appeared after dramatic changes in their weight and height. Strialite™ stretch mark device, an over-the counter device that has been clinically proven to reduce the appearance of stretch marks in as little as four weeks. The base (treatment plate) contains 35 red light emitting diodes (LEDs) and heating elements that generate temperature up to 105°F (40°C) that produces a gentle heat, both of which aide in the reduction of the appearance of stretch marks. The LED light and heat work together to stimulate the skin at the cellular level, decreasing the appearance of the stretch mark.

[www.Strialite.com](http://www.Strialite.com) *Mishawaka*

## CCHEFSFRIDGE CO.

### ArcticRx - #VaccinEquity in a box

ArcticRx, which is approximately the size of a dishwasher, is designed as a transportation and temporary Ultra-low temperature storage pod for areas with no or limited access to electricity. The product is a direct response to lack of health equity systems in cold chain delivery logistics on an international scale. We eliminated Styrofoam as a packing material and focused on durability, recyclability, flexible capacity and stable temperature lifespan. Design and weight were calculated to meet varying global transportation models ranging from planes and ships to flatbed trucks and small teams of handlers. Commercial materials to build the pods were based on raw materials accessible by low-income countries. ArcticRx addresses complex delivery logistics exacerbated by the need to recharge coolant during transport. With ArcticRx rural clinics and vaccine sites will have an instant, self-contained passive pod (no electricity or battery). ArcticRx addresses the 50% vaccine waste in low-income countries, weaknesses in the Ultra-low temperature (ULT) cold chain logistics and health equity. ArcticRx, which was jointly produced by Rolls-Royce and ChefsFridge Co., has achieved ULT control of -77c for 28 days through testing and data collection. Engineering data suggests this can be 30-plus days depending on the interior load. The internal cavity is designed to provide storage for 4,000 to 15,000 doses per pod. <https://arcticrx.com>  
*Anderson*

## COAL IRON WORKS

### Forging presses

We are a small team of builders, creating hydraulic forging equipment for Blacksmiths and Bladesmiths. We ship our presses all over the world. We're featured as the main forging equipment on Forged in Fire and have demonstrated our tooling all over the United States. We've been building our forging press for the last six years

and are often imitated as the standard of forging presses within the Blacksmithing and forging community.  
[www.Coaliron.com](http://www.Coaliron.com) *Anderson*

**CONN SELMER INC.**  
**Artist select trumpets**

Hand made in Elkhart, Artist Select Bach Trumpets are chosen by Conn-Selmer legendary artists, like Rashawn Ross of Dave Matthews Band. Each Artist Select horn has unique characteristics and sound qualities due to the handmade nature of their build and design. Visit [select.conn-selmer.com](http://select.conn-selmer.com/) to hear and see these unique instruments played by some of the best trumpet players in the world. <http://select.conn-selmer.com/> *Elkhart*

**DCS TECHNOLOGIES, INC.**  
**Pedestrian Avoidance Safety System (PASS)**

DCS' PASS product (Pedestrian Avoidance Safety System) is designed to help city bus drivers avoid collisions with pedestrians, cyclists, and vehicles. Utilizing LiDAR sensors, PASS' Collision Warning System function detects and tracks objects, warns the bus driver of an imminent collision, and automatically applies the brakes. PASS's Automatic Emergency Braking system slows the vehicle at a level that keeps bus passengers from being thrown about while still providing valuable braking during the driver's reaction time. Furthermore, PASS has a black box feature that captures critical bus data during collision warning and braking events. <http://www.dcsfusion.com> *Westfield*

**DORMAKABA  
Switch Tech**

Switch Tech is dormakaba's latest innovative platform with the first product being the Switch Core under the BEST product portfolio. It is the world's first electronic SFIC to bring true access control to customer's mechanical hardware. Utilizing revolutionary BLE credentialing (use your phone to open the doors), customers will experience some of the benefits previously reserved for costly hardwired or wireless access control. Easy to survey, easy to install, easy to maintain, Switch Tech will bring a solution to more locks than any other product previously.

<https://timeforaswitch.com> *Indianapolis*

**ECOGOLFBALLS  
Biodegradable golf ball**

Since MARPOL V Treaty was signed into International Law, no plastic golf balls are allowed into our oceans. The practice of hitting golf balls off cruise ships came to an end in 1991. [www.ecogolfballs.com](http://www.ecogolfballs.com) *Indianapolis*

## ESTES AUTOMATED WEAPON SECURITY

### Police SUV rapid access weapon locker

The SUV Rapid Access Weapon Locker provides state-of-the-art security, durability, and automated opening technology built to protect law enforcement and communities. The shell of the locker is made of 18 gauge galvanized steel and drawer front is made of 14 gauge galvanized steel, making it secure and tamper proof. It has a sleek powder-coated design with a carpet-lined drawer to protect weapons. The locker opens automatically by a wireless remote, but also comes with a manual key override in the event of disabled vehicle power or a lost remote. <https://estesaws.com> *Indianapolis*

## FOX PRODUCTS

### Bassoon

Bassoon is a woodwind musical instrument. It is manufactured completely in South Whitley. We buy the veneer maple logs, process the logs into blocks and let the wood age for over 4 years prior to production. Our team executes roughly 100 steps including hand-crafting the keywork, silver plating in our in house facility, and hand fitting the finished keys to the instrument. After manufacturing is complete, each instrument is play tested by a skilled musician prior to sending the instrument out to one of our dealers who are located around the globe. Our instruments are played around the world by musicians that range from student beginners to professional orchestra players. <https://www.foxproducts.com/index.php> *South Whitley*

## GEN-Y HITCH

The BOSS torsion-flex drop hitch

GEN-Y's Boss adjustable drop hitch is unlike anything on the market. The built-in, patented Torsion-Flex Technology makes this product the best hitch for ultimate ride control and safety while towing any bumper style trailer on the market, including pintle style couplings. It has the capability to absorb up to 90% of the inertia between truck and trailer when you're driving down the road. Furthermore, it is fully adjustable so you will no longer have to buy multiple hitches for towing multiple applications. This hitch has the capability to: protect cargo from harsh bumps, increase fuel economy, create a smoother ride, and reduce tire wear on your truck and trailer.

## GLASS GRIPPER

Glass Gripper

At Glasses Gripper, we create work surfaces that eliminate painful hand injuries while reducing unintentional scratching of frames or lenses. By using a Glasses Gripper while adjusting glasses or inserting lenses, you can make your job safer, faster and more profitable. <https://glassesgripper.com> *Decatur*

**GRAPHIC PACKAGING INTERNATIONAL-SPECIALTY PACKAGING DIVISION**  
**Gorilla Glue tool box display**

The Specialty Packaging Division of Graphic Packaging International (GPI) located in New Albany produced The Gorilla Glue Company's new product, the Gorilla Glue Tool Box Display. <https://www.graphicpkg.com> *New Albany*

**GREEN CUBES TECHNOLOGY**  
**Lithium Safeflex batteries**

The material handling division for Green Cubes Technology produces lithium batteries for forklifts and other types of equipment. We are headquartered out of Kokomo, IN and produce the batteries here at our facility located at 2121 East Boulevard. Our product is an innovative game changer to the material handling industry and environmentally friendly. We assist companies across the globe in achieving their sustainability and electrification goals. We have grown substantially year over year in our workforce throughout all of our global locations. <https://greencubestech.com> *Kokomo*

## GREEN OAK ANTIQUES

### Large two-piece display cabinet

Our two-piece display cabinet is made of new material and designed by Green Oak Antiques in Rochester. We made a copy of old porch trim for the top, added ceiling tin on the back and the door panels give it a unique style. This is painted in a one of a kind finish. [www.greenoakantiques.com](http://www.greenoakantiques.com) *Rochester*

## HMC GEARS

### Large gears for Ozark Hydroelectric Power Plant

HMC Gears manufactured a large gear set and pinions for the Army Corps of Engineers. They will produce electricity for the Ozark Hydroelectric Power Plant in Ozark, Arkansas. These components are for a speed-increaser that connects the turbine to the generator. The gear and shaft assembly weigh roughly 125,000 pounds and consists of a 174" diameter low speed gear and a 143" long low speed shaft. We also manufactured two low speed pinion shafts each weighing over 26,000 pounds. These speed-increasers are rated at 33,800 horsepower. [www.hmcgears.com](http://www.hmcgears.com) *Princeton*

## HOOSIER BAT CO.

Wood baseball bats (used in Major League Baseball)

Hoosier Bat Co has been manufacturing wood baseball bats in Valparaiso Indiana since 1991. We sell to the youth leagues all the way up to the professionals. We have a specialty bat that our co-owner - Dave Cook - invented. It is three pieces of wood finger-jointed together. The three woods are a birch handle, 6" hickory hitting area and maple on the barrel end. This bat has phenomenal balance and will outlast any other wood bat because we can use a smaller piece of wood in the handle, thus a quality handle. Also hickory will not flack like other woods so the barrel will last forever. In addition to game bats, we do award bats. [www.hoosierbat.com](http://www.hoosierbat.com)

*Valparaiso*

## HUDSON AQUATIC SYSTEMS LLC

Underwater treadmills for dogs, horses and humans

Hudson Aquatic Systems LLC designs, engineers, manufactures, assembles, sells and services underwater treadmill systems from our facility in Angola and ship them all over the world. The idea is to use the natural properties of water; buoyancy, resistance and hydrostatic pressure, to create the best environment to exercise. The underwater treadmill exercises the muscles we need for everyday life. Our systems can vary the water depth, change the speed and direction of the treadmill, adjust the heat of the water and increase resistance using water jets to create the best environment for the user. The buoyancy reduces the load on the joints while the hydrostatic pressure increases the resistance on muscles. Heat relaxes and allows the muscles to stretch further. The underwater treadmills can be used for bone and muscle damage, neurologic, stroke, cardio and exercise. We manufacture systems for humans, small animals and horses. [www.hudsonaquatic.com](http://www.hudsonaquatic.com) *Angola*

## ITAMCO

### ABB gearbox build (used in New Orleans after Hurricane Katrina)

In 2005 after Hurricane Katrina hit and the levy broke in New Orleans, ITAMCO was contacted by Baldor to make the internal gear sets for 10 large pumps and seven smaller pumps that would be responsible for pumping water away from the levy. Because ITAMCO had just purchased a 450,000 sq ft building in Argos earlier that year, space was not the constraint. The large pumps manufactured in Argos successfully pumped 18,000 cubic feet of water in one second, which is enough to fill a 27-foot round above ground swimming pool. [www.itamco.com](http://www.itamco.com)  
*Plymouth*

## JANUS MOTORCYCLES

### Production motorcycles

At Janus Motorcycles, we make simple, beautiful machines that are a joy to own and ride. We draw on the Northern Indiana spirit of manufacturing to create hand-built, personal, unique, and relatable products. We utilize our global marketplace to source reliable, tried-and-true components. We build to order and sell directly to our riders in all 50 states, cultivating a connection with each and every owner. <https://www.janusmotorcycles.com>  
*Goshen*

## KAISER ALUMINUM WARRICK

### Aluminum sheet for food and beverage packaging

Sometimes the “cool” is in HOW something is made. Kaiser Aluminum Warrick (KAW) near Newburgh, IN, is the largest manufacturer of coated aluminum sheet for food and beverage containers in North America. Chances are that you have used metal from KAW recently. KAW takes aluminum recycled from a wide variety of sources and combines it with pure molten aluminum. Then, they add precise amounts of magnesium, silicon, iron, copper, zinc, and manganese to the liquid metal. When the molten aluminum is ready, KAW uses large electromagnets to hold more than 1,900 gallons of aluminum suspended as it is poured in a 44,000-pound block without using a physical mold. During the rolling process, KAW flattens the 30-foot-long, 21-inch-thick ingot into an aluminum coil 10 miles long and as thin as 10 pieces of paper. The gigantic Hot Mill operates at 900oF and has as much horsepower as twice as many racecars than in the Indy 500. The Cold Mill produces enough aluminum sheet for several million cans every hour. The final step in the production process is coating the metal with a food-safe finish. It’s then ready to be cut into the various widths needed to form can bodies, lids, and tabs. Whether soft drinks, energy drinks, canned meats, pull-top snacks or beer, KAW metal is used by millions of people from coast to coast. <https://www.kaiseraluminum.com/markets/packaging> *Newburgh*

## KOKOMO OPALESCENT GLASS

### Opalescent glass (Tiffany lamps, in the Vatican)

Founded in 1888, Kokomo Opalescent Glass (KOG) is the oldest producer of hand cast, cathedral and opalescent glass in the U.S. In 1888, one of the first shipments of opalescent glass went to American artist and designer Louis Comfort Tiffany. It included 600 pounds of blue and white opalescent glass and was the beginning of a strong relationship with the artist. Tiffany preferred KOG for the mineral impurities found in its opalescent glass,

which resulted in exceptional colors and textures he incorporated in his famous lamp designs. KOG utilizes the same recipes and processes that solidified its 19th century reputation as a premier glass manufacturer. It also develops distinctive new colors and textures sought by 21st century architects and artists. Kokomo Opalescent Glass can be seen in the Vatican, the Chicago Cultural Center, Frank Lloyd Wright's Dana House, Disney World (Florida, California and Tokyo), The White House, Yellowstone National Park, Washington D.C. Metro and DreamWorks Studios. <https://kog.com> *Kokomo*

## **LAFAYETTE INSTRUMENT CO.**

### **LX6 polygraph instrument**

Lafayette Instrument is the world's leading manufacturer of polygraph instrumentation. Our polygraph systems include a data acquisition instrument and sensors for collecting respiratory, cardio, movement and electrodermal activity. Also included is software for chart collection, scoring and reporting. Our made-in-Indiana equipment is used in more than 100 countries around the world for military, law enforcement, and investigative purposes.

<https://lafayettepolygraph.com> *Lafayette*

## **LAIDIG SYSTEMS INC.**

### **Silo reclaim systems**

Laidig is a global leader in designing and building reclaimers to automate the unloading of dry bulk materials. The reliability and sophistication of Laidig's reclaimers have proved to be invaluable for industrial, process-driven applications in industries such as food processing, meals, pulp & paper, wood pelleting, biomass, power, biofuels,

ethanol, mining & minerals, cement, and many more. Laidig specializes in aggressive, screw-type bottom reclaimers designed to start and operate under a full material load. The screw rotates about its own axis pulling material toward the center of the silo floor. At the same time, the screw slowly advances, sweeping around the entire silo floor. Material augered to the center of the silo floor, then flows down through a center chute below the floor and into a discharge auger or conveyor for transfer out of the silo and to the next step in the material handling process. [www.Laidig.com](http://www.Laidig.com) *Mishawaka*

## MAJOR TOOL & MACHINE

### Contract manufacturing services

Major Tool & Machine manufactures the RS-25 Engine Nozzles and components for NASA's Space Launch System (SLS) program. Aerojet Rocketdyne is the prime contractor for the flight proven, high-performance RS-25 engines used to propel America's next-generation heavy lift launch vehicle, NASA's Space Launch System (SLS). Four RS-25 engines located at the bottom of the core stage will power the rocket on its eight and a half minute climb to space with more than 2 million pounds of thrust. The Nozzles that MTM manufactures are part of a new generation of RS-25 engines for when the 16 engines remaining from the Space Shuttle program are used. These engines are targeting a 30% cost reduction from the engines that flew on the Space Shuttle and will feature the latest in advanced manufacturing techniques, including 3-D printing. [www.MajorTool.com](http://www.MajorTool.com) *Indianapolis*

## MARION-KAY SPICES

Custom-blended spices (included for KFC)

For more than 100 years, made spices, breading, extract and custom blending. Can duplicate any blend. Made formulation for Colonel Sanders in early 1960s. [www.marionkay.com](http://www.marionkay.com) *Brownstown*

## MONOFOIL

Antimicrobial disinfectant for COVID-19

Kills 99.9% of viruses and bacteria! MonoFoil D has been approved to kill the SARS-CoV-2 virus in association with COVID-19 in 3 minutes on hard non-porous surfaces. See label for surfaces. MonoFoil D uses no harsh chemical odor and works as a dual action disinfectant and cleaner approved by the EPA to use to protect against COVID-19 and other bacteria, mold, mildew and odor. [www.monofoilusa.com](http://www.monofoilusa.com) *Elwood*

## NEXUS VALVE INC.

### UltraMatic/UltraMB flow control valves

At Nexus, we support our customers with innovative hydronic solutions that improve system performance, save energy and optimize installation. The UltraMatic and UltraMB flow control valves do just that. By regulating fluid flow in hydronic heating and cooling systems, the system operates more efficiently and offers greater occupant comfort. These unique valves combine the features of 3 discrete products into 1 reducing installation time and potential leaks. The UltraMatic and UltraMB are the only flow balancing valves that can be field converted without changes to the piping system. This means that an UltraMB can become an UltraMatic offering more efficiency and energy savings to the building owner. In addition to the energy savings, Nexus offers the widest variety of connection fittings to make installation of these valves simple and efficient some of which don't even require tools. [www.nexusvalve.com](http://www.nexusvalve.com) Fishers

## NEXXT SPINE

### MATRIX 3D printed titanium spinal implants

The Nexxt Matrix System of 3D printed porous titanium leverages Nexxt generation technology to create interbody and VBR devices with optimized open architectural porosity, residue-free surface technology and robust radiographic imaging performance. These devices and novel technologies also permits Nexxt Spine the ability to provide custom or patient specific devices for trauma, tumor and deformity procedures. <https://nexxtspine.com> Noblesville

## OLD 55 DISTILLERY

Bottled-in-bond 100% sweet corn bourbon

This product is the definition of Hoosier... Indiana high school gymnasium + delicious Indiana sweet corn + Indiana family farm. Located in Newtown, on the family property, which encompasses acres of generations old farm ground, family grain elevator business and the former Richland Township High School gymnasium from 1941. The renovated high school gymnasium turned in its 10-foot basketball hoops for an 18-foot copper distillery towers and is now home to the Fruits family's farm-to-bottle Old 55 Distillery. A highly sought-after claim in the whiskey industry is having a product that is classified as being bottled-in-bond (product of one distillation season by one distiller at one distillery), let alone using input grains from the same property. Master Distiller, Jason Fruits, set out to make the world's first and only 100% sweet corn mash bill bourbon. After accomplishing this goal, and gaining national attention and awards with their product offerings, they are set to put Indiana on the map for Bourbon lovers across the globe. <https://old55distillery.com> Newtown

## PLAY-LIFE NATION

Revel Round

REVEL●ROUND is a new recreational gaming product that is extraordinarily fun and innovative. Gameplay only requires 10'-15' making it ideal for social entertainment inside and out. Welcome to play that moves you physically, excites you emotionally and is specifically engineered to fit your playful lifestyle. The play experience of REVEL●ROUND is often described as a mix between corn-hole and hacky-sack. In other words, teammates stand on opposite ends of each other and toss bags to score kind of like corn-hole. But wait, here's the kicker...Your teammate can partner assist tossed bags that miss the board to score kind of like hacky-sack. Shake in the fact that REVEL●ROUND is also a seat capable of supporting up to 275 lbs. and what do you get? A

completely original experience that is interactive, authentic and undeniably cool. ## RESIDENTIAL WARRANTY SERVICES

### Breeze radon monitor

The Breeze Radon monitor has patented components (patented by inventor P. Nathan Thornberry) and over 20 features that are exclusive to the Breeze products like GPS verification of where the tests are being taken, immediate notification of tampering (including the home environment), and even a predictive modeling feature that reduces the typical and customary 48 hour waiting period for Radon results to as little as 6-10 hours on most tests. The one feature that truly sets these units apart is the oversize Radon detection chamber and the exclusive digital dual-calibration capabilities that results in the most accurate Radon testing unit ever created.

## RICHEY ATHLETICS

### Pole vault landing systems

Richey Athletics Pole Vault Landing Systems are produced with 100% Hoosier labor at our facility in Frankfort, Indiana. A landing system includes the standards that hold up the crossbar, the mats that catch the athlete after an attempt and the tarping system that protects the equipment when not in use. All fabric, thread, glue, steel, and lumber are made in America, and the foam in the mats is also a Hoosier manufactured product. With the

safest, highest warrantied, most durable pole vault landing system on the market, Richey Athletics supports athletes at every level of competition, from the elementary age novice to the D1 collegiate athlete chasing that elusive next bar! [www.richeyathletics.com](http://www.richeyathletics.com) *Frankfort*

## SEYMOUR MIDWEST

### Midwest Rake EasySqueegee

A truly cleanable and reusable precision application squeegee system. The EasySqueegee features a self-leveling, self-locating design along with multiple color-coded blade options (sold separately) for easy, consistent application of epoxy coating materials. Ergonomic, lightweight and easy to clean! [www.seymourmidwest.com](http://www.seymourmidwest.com) *Warsaw*

## SMOKEY LIGHTS LLC

### Lamps

These unique lamps are designed to evoke emotion and delight. Manufactured deep in an underground lab by the award-winning Chief Luminary, SmokEy Lights appeal to all types of people—those who love deep wood tones reminiscent of a gentleman's library, perhaps those who are attracted to a more steampunk aesthetic, or even those that love nostalgia and whimsy twisted together. There is always a SmokEy Light that will speak to you. Each SmokEy Light is crafted with care and many include repurposed pieces. The Chief Luminary delights in rescuing forgotten relics of our past and giving them new life. Proudly made in Indiana with parts sourced from across the U.S. [www.smokeylights.com](http://www.smokeylights.com) *Franklin*

## SPECIALTY RIM SUPPLY

### Aluminum auto rims

Spun forged aluminum auto rims (large inventory) coupled with the most dependable service in the market. We strive to constantly reinvent ways to be your reliable partner in building the best wheels. [www.specialtyrim.com](http://www.specialtyrim.com)  
*Terre Haute*

## STUDIO PRODUCTIONS INC.

### Chameleon scrim (used in Super Bowl, movies, etc.)

Chameleon scrim is a special effects product primarily used for making people and settings appear and disappear on stage. This application only uses the scrim and some clever lighting. But it's cooler than that. It also is great for front and rear projection. It can do silhouettes and shadow screens too. It can be printed and painted. And it's naturally a near perfect grill cloth (sound passes through it). Chameleon is used in theatres, universities, installation artists, museums, amusement parks, churches, sound stages, events, schools and television studios. We've sent it to a George Clooney movie, Cirque du Soleil, Disney and an Olympic Torch Ceremony. Churches and cathedrals use this same product to cover pipe organ grills. Many times we don't even know where our product ends up. We once saw our product at the Super Bowl (used to hide the security forces in place). We know it was used in Central Park in a pyramid structure. We also know it has been used in the Burning Man festivals. The Saints Simon and Jude cathedral has two 7-foot by 13-foot original artwork portraits of Saints Simon and Jude that we were commissioned to do on Chameleon (because of acoustical properties and air flow).

## SUBARU OF INDIANA AUTOMOTIVE

### Subaru Ascent

Exclusively manufactured in Lafayette by Hoosiers, the Subaru Ascent is the automaker's largest and most versatile vehicle ever. Since beginning production at Subaru of Indiana Automotive on May 7, 2018, more than 262,000 Ascent vehicles have been built. The three-row SUV is one of four models made at Subaru's only manufacturing facility outside of Japan. The Ascent features standard Symmetrical All-Wheel Drive (AWD) and a Direct-Injection Turbocharged SUBARU BOXER® engine that gets up to 27 mpg and delivers 260 horsepower and 277 foot-pounds of torque. It can tow up to 5,000 pounds and boasts 8.7 inches of ground clearance. The spacious interior offers up to 153.5 cubic feet of space for seven to eight passengers, up to 86.5 cubic feet of cargo space and perhaps most famously—19 cup and bottle holders. With EyeSight® Driver Assist Technology standard, along with additional safety features, the Ascent has received the highest possible ratings from the Insurance Institute for Highway Safety (IIHS) and National Highway Traffic Safety Administration (NHTSA). And it's also built to last as 97% of Subaru vehicles sold in the last 10 years are still on the road today.

## TOYOTA MOTOR MANUFACTURING, INDIANA

### Toyota Sienna

The Toyota Sienna minivan is one of two Hoosier-made vehicles that are known and loved all over the world. Since 2003, Toyota Indiana has been the sole, global producer of this awesome vehicle and relies on the expertise of thousands of Indiana employees to produce an award-winning product. The Sienna has more than 3,500 parts and takes roughly 20 hours to produce start to finish. But, because of the ingenious planning and coordination of Toyota Indiana team members, a new Sienna is born approximately every 60 seconds. The Sienna went full-on green with her 2021 model making the bold decision to become all-hybrid. But make no mistake. She may have changed the way she operates, but not how she performs. This chick sports a 16 valve, 2.5-liter engine with a double overhead cam shaft and electric fuel injection making for a combined 36 MPG and 3,500-pound towing capacity, and is available in all-wheel-drive. And she's got tech—lots of it. We're talking a multimedia system with dynamic navigation, 7 USB ports, 4-zone climate control, parking assist, remote connect, and of course Toyota Safety Sense. The Sienna is an all-around total package. <https://www.toyota.com/sienna> *Princeton*

## TREK POOLS

### Shipping container pools

Trek Pools, located in the former GM manufacturing facility, takes shipping containers and modifies them into custom pools for clients across the US. We utilize local craftsman to fabricate, coat and equip our pools. These

types of pools are revolutionizing the pool industry. Proudly made in Indiana, Trek Pools is the only US based container pool container company to date, manufacturing the entire pool in the US. We have experienced exponential growth over the last 12 months and are excited to be featured on the TV show "This Old House" coming in the Spring of 2021. [www.trekpools.com](http://www.trekpools.com) *Anderson*

## **TYLER TRUSS LLC**

### **Tyler GT Plus – pre-rig lighting truss for concert/event lighting**

Tyler GT Truss was designed and introduced in 2007, for immediate use on concert tours including AC/DC, Elton John, Neil Diamond and others. In the past 14 years, Tyler GT has become the No. 1 lighting pre-rig, theatrical truss for concerts/festivals, concert touring, corporate event productions, entertainment venues and more around the world. And thanks to many add-on accessories over the years, such as those that make arches and angles easier to achieve, Tyler GT is just getting started. <http://www.tylertruss.com> *Pendleton*

## **VALEO THERMAL COMMERCIAL VEHICLES NORTH AMERICA INC.**

### **UV purifier**

With an inactivation rate of more than 95%, the air in the passenger compartment of a school or transit bus is cleaned of harmful viruses such as SARS-CoV-2, bacteria and mold spores during a single airflow cycle. Purified air thus flows continuously during the entire journey and circulates in the passenger compartment, ensuring that the virus concentration in the bus is kept at a low level, even when there are infected persons on board who are constantly breathing out viruses. For us, the limit value for virus concentration in the interior of the bus is the same

threshold value as for a hospital operating theatre at the start of an operation. [https://www.valeo-thermalbus.com/us\\_en/Innovation/UV-air-purification](https://www.valeo-thermalbus.com/us_en/Innovation/UV-air-purification) *Elkhart*

## VERMETTE MACHINE COMPANY INC.

### Keg jockey/lift

The keg jockey is used to move and stack 160-pound kegs of full beer; It was designed to prevent injuries of anyone required to stack full kegs of beer on shelving or each other. [www.vermettlifts.com](http://www.vermettlifts.com) *Hammond*

## VESTIL MANUFACTURING

### Fully powered rough-Terrain gas-powered pallet truck

A solution for moving heavy pallets and skids over rough surfaces! This industrial-grade pallet truck features a gasoline-powered drive system providing the power needed to move heavy loads over packed dirt, sand and gravel surfaces. It has an easy electric start, three position handle with raise/lower lever, a throttle lever for speed control and adjustable forks. The unique design easily rolls on foam-filled pneumatic tires. It is great for use in construction areas, nurseries, landscaping areas and farms. <https://www.vestil.com/product.php?FID=336> *Angola*

## VIEWRAIL

### Floating stair systems

Viewrail Floating Stair Systems eliminates the pain of multiple vendors and drawn-out timelines. With clean lines, uncompromising materials, and expert craftsmanship, your system will be the centerpiece of your home. These open riser stairs create sleek lines that soar in mid-air. Give your home the best in open-concept design with a form that combines excellent performance with elegant strength. All of this arrives in a package that can be installed by licensed professionals in a single day. With thousands of systems successfully delivered all over the USA, Viewrail is the best option for modern floating stairs. Best of all, due to our scale of manufacturing and world-class automation, we can deliver floating stair systems more affordable than a local fabricator with greater levels of customization and a variety of materials. All of our systems are compliant with national building code requirements, often exceeding all standards of safety requirements. No matter the space, no matter the material, we have solutions engineered to take your home to the next level. We don't box you in when it comes to design, your system is as unique as your home--it's one of a kind. <http://www.viewrail.com/floating-stairs> *Syracuse*

## WAG'N TAILS MOBILE CONVERSIONS

### Mobile pet grooming salons and veterinary clinics

We make vans for groomers or veterinarians for pet care in their clients; driveways. Convenient as heck!  
<https://wagntails.com> *South Bend*

## WARM GLOW CANDLE COMPANY

### Candles

Warm Glow candles feature the classic Warm Glow lumpy, bumpy exterior and is available in over 70 fragrances. Each Warm Glow candle is created by hand with meticulous care by our production staff, giving our product a personal touch. [www.warmglow.com](http://www.warmglow.com) *Centerville*

## WAYZADA

### Custom 3D prints of outdoor adventures

Finished your first marathon? An epic hike? Proposed at a scenic overlook? These memories are inextricably linked to place, to the journey that you've taken. WayZada turns the data collected on your fitness watch into a tangible, shareable memento to commemorate the meaningful adventures in your life. [www.wayzada.com](http://www.wayzada.com) *Bloomington*

## WEBER GROUP INC.

### Themed entertainment elements

The Weber Group team has provided theming and concept design services for well-known brands like Nickelodeon, Warner Brothers, Angry Birds and LEGO. We work to create immersive spaces that encourage guests to treasure the experiences we build and the brands that we work with. Theme Parks, Water Parks, Zoo's, Museums, Parks and Science Centers are just a few areas we work in. <https://webergroupinc.com> *Sellersburg*

## WHEELIN' WATER

### Portable hydration sports equipment (used by Kansas City Chiefs)

Wheelin' Water is a small business that came out of an idea to solve a big problem - young kids/athletes who die from dehydration on the football field, soccer or other field sports. Owner Greg Parks designed, built and distributes portable water tanks. Athletes don't have to share water bottles or hose spouts, and can get the water where they are on the field. Parks recently added a "contactless!" system. It's American ingenuity and Indiana entrepreneurship at its best. His portable water system is now used by several NFL teams and NCAA universities plus many IHSAA schools. [www.wheelinwater.com](http://www.wheelinwater.com) *Fort Wayne*

## WOOD-MIZER

Portable sawmills (various uses including building houses and making baseball bats)

Built in Indiana since 1982, Wood-Mizer portable sawmills help hobbyists and businesses turn logs into lumber. Woodworkers, farmers, tree services, sawyers, homesteaders, builders, educators, missionaries, and more rely on Wood-Mizer sawmills to build their own dream homes and projects, keep barns and fences maintained, or operate their own business selling lumber or wood products. With a patent granted in 1985, Wood-Mizer portable sawmills were invented, designed, and made in Indiana and became a true innovation for the global sawmilling industry. By combining pickup truck portability with thin-kerf blades, more boards are recovered from every log, less energy is used to operate, and fallen trees in the forest or city are able to be salvaged by a single person on-site. For the very first time, individuals could start sawmilling and make the most out of our beautiful, renewable, and natural local wood resources. Celebrating 40 years, Wood-Mizer is the global leader in the portable sawmilling industry with more than 100,000 sawmills in 120 countries throughout the world. Today, Wood-Mizer stays rooted in Indiana with two manufacturing facilities in Batesville and Indianapolis with 450-plus employees. Recently, Wood-Mizer portable sawmills have been part of creating 20,000-plus wooden toy cars in Michigan for Operation Christmas Child, rebuilding 600-plus homes in Fiji after a hurricane, making Major League Baseball bats in North Carolina and much more. <https://woodmizer.com> *Batesville and Indianapolis*
